The amount of each loan is not to exceed 10l. to be lent without other the rate of 3l. per cent. per annum, and is to be secured by the bond of the borrower, with two sureties. Printed Forms of Applications, and all necessary information, may be obtained by applying personally, between the hours of Ten and Three o'clock in the day, at the office of the Clerk and Solicitor to the Trustees, No. 14, Great Queen-street, St. James's Park.

By order, EDWARD S. STEPHENSON, Clerk and Solicitor to the Trustees.

NOTE.—The Trustees meet on the second Wednesday in every month, to consider such applications for loans as have been sent in one clear week at the least before the first day of the month.—The omission must be unexceptionable.

NATIONAL ASSURANCE and INVESTMENT ASSOCIATION,
7, St. Martin's-place, Trafalgar-square, London.
Established May, 1844.
INVESTMENT OF CAPITAL AND SAVINGS.

The object of the Investment Department of this Institution is to open equally secure and profitable channels of investment for the surplus capital of the affluent, and the provident savings of the industrial classes of the community. To persons desirous of placing their money out at interest, but unused to seeking securities, and inexperienced in estimating their values, this Institution offers immediate facilities, and an opportunity of realising the highest rate of interest yielded by first-class securities, in which alone the money deposited with the Association is employed.

Interest payable in January and July.

CAPITAL STOCK, £100,000.

The Capital Stock is altogether distinct and separate from the Depositors' Stock in the Investment Department of this Institution. It constitutes, with the Premium Fund, a guarantee for the security of the Assured, and has been provided in order to render the security of the Assured complete.

FOR SECURING LOANS OR DEBTS.

Amongst the varied and extensive Tables of this Institution will be found one peculiarly advantageous where Policies are required for securing loans or debts. The rate of Premium by this Table will protect the Interest of the Policy-holder from all contingencies, and allow the Life assured to proceed to, and reside in, any part of the world.

MUTUAL ASSURANCE:—

Assurances may be effected from 5l. to 10,000l. on a Single Life.
Entire profits belong to the Assured, and divided annually.
Credit for half the amount of the first Five annual Premiums.
Medical men remunerated for their Reports.
Liberty to Travel, and Foreign residence, greatly extended.

COLLEGE EDUCATION.

A Novel Table has been constructed expressly for the use of this Institution, whereby a Parent, by the payment of a very small annual premium, may, in the event of death, secure to a Child, either on Assenty, payable from the age of 17 to 25, as an equivalent to a Legacy.

Other new and important Tables for Educational purposes, and Endowments for Children, are in course of, construction, and will shortly be published.

The Tables for Reversionary and Deferred Annuities, are particularly deserving of attention, whether regarded as a means of providing for a particular individual, or as a resource against the casualties of age, in ceiling, as it does, the uncertainties of health and fortune.

Full information and prospectuses may be obtained, on application at the Head Offices of the Association, or to the respective Agents, throughout the United Kingdom.

PETER MORRISON, Managing Director.

Applications for Agencies may be made to the Managing Director.

THE NATIONAL PATENT STEAM FUEL COMPANY, provisionally registered, pursuant to 7 & 8 Vict. c. 110, to be incorporated by Act of Parliament or Royal Charter, limiting the liability of shareholders. Capital, 20,000l. in shares of 5l. each, to be paid upon allotment, after complete registration.

The directors have carefully estimated the cost, from actual experiment, of manufacturing 1,000 tons of fuel per week, on account very far below the value at which it may be fully calculated upon; and they find very good reason in stating that the sale of even that limited quantity will not only enable the Company to pay a dividend of 10 per cent. upon the capital invested, but likewise to set aside a reserved fund for the extension of their works.

Various conditions respecting the terms of this fuel used on board Government and other Steamers, can be seen at the office of the company.

Applications for the remaining shares may be made, according to the annexed form, to the Secretary or Solicitor, at the offices of the Company, 49, Fenchurch-street, where prospectuses and every information respecting the working results of this undertaking may be obtained. Applications may also be made to Messrs. Hopkins and Co. 14, Gresham-street, Old Broad-street, the shareholders of the Company.

Form of Application for Shares.

To the Directors of the National Patent Steam Fuel Company.

Gentlemen,—I request you will allot me shares in the above Company, and I hereby undertake to accept the same, or any less number that may be allotted to me, and pay the sum of 1l. per share when required.

WHITE, or OXIDE of ZINC.—LANGTON, SCOTT, and WHITE,
Patentees and sole Manufacturers in the United Kingdom, are now furnish SHIPPERS and the TRADE with a large and regular supply of WHITE ZINC, for paint, enamelling, paper staining, chintz, prints, floor-cloth, &c. &c. of uniform quality and colour and superior body.
Monthly contracts made, and sample casks of not less than 1 to 2 cwt. forwarded (carriage paid) from their works,
Grand Surrey Canal Dock, Rotherhithe, London.

DAMP WALLS.—NEW PATENT PAINT, as used at the TOWER, by order of HER MAJESTY'S HONOURABLE BOARD of ORDNANCE; at the TUNNEL; ZOOLOGICAL GARDENS, Regent's-park, and various other public and private buildings; in quantities to finish twenty square yards for 15s.
PATENT LIQUID CEMENT for the fronts of houses, its beauty pre-eminent, giving the appearance of fine cut stone, at only one-eighth the cost of Oil Paint. In casks of 1, 2, and 5 cwt. at 8l. 10s. and 20s. each.
PATENT MINERAL ZINC PAINTS, invaluable for ship-work, beauty, and permanence, ready for use. White Stone and Lead, in Oil, Turpentine, &c. per gallon.
BLACK MINERAL PAINT, very permanent, half the usual price; only 8s. per gallon.
NEW PATENT COLOUR for inside work, may be applied to Wood, Stucco, Cement, or over Oil Paint. No smell, and will dry in an hour. In casks of 1 cwt. at 14l.
G. BELL and CO. Steam Mills, 5, Wellington-street, Gravel-street, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.—THE PERMANENT WHITE of the Artist, by its combination with zinc restored to the use of the artist, is now offered at the price of the ordinary white lead.
Four years since the proprietors placed their manufacture on a large scale, and put this elegant Paint in competition with White Lead.
Its confessed superiority over every other paint without having brought forward various limitations.
These inferior productions, frequently made from zinc ores containing lead, are unhealthy to the manufacturer, unhealthful to use, not healthful to the consumers of rooms newly painted with it.
As a guard to the painter against the substitution of the inferior paints, each cask is stamped
"HUBBUCK, LONDON, PATENT"
and if the cask has not been so marked, the reason is obvious.
The powdered White Zinc also may be had for grinding in oil also for use for porcelain cards, for lacemakers, for gutta percha, for plaster decorations, and the other purposes where it is used with dam, gum, varnish, spirit, &c. &c.
A circular with full particulars may be had of THOMAS HUBBUCK and SON, Colour Manufacturers, opposite the London Docks.

PURE PATENT WHITE ZINC PAINT, from the VIEILLE MONTAGNE ZINC MINING COMPANY of BELGIUM.—This PAINT is superior in every respect to white lead; it is unexcelled in whiteness, and grows very hard after it is applied, and is, therefore, for inside work, susceptible of a high polish. Besides, it is entirely free from all poisonous influence, a consideration by no means to be lightly regarded, as any gases and pervade the original colour, which white lead does not do.
WHITE ZINC PAINT causes none of the ravages invariably committed by white lead upon the human frame; neither painters' colic, nor paralysis, &c. &c. to whom dangerous complaints the workmen and manufacturers who use it are subject, and to which persons who inhabit newly-painted apartments are also liable. Since its introduction into the United Kingdom by the patentee, the Admiralty and Government Departments have given the preference in their purchases over any other paint. The public is cautioned, that if white zinc paint is adulterated, it becomes a very inferior paint, instead of a first-rate one, and peels or washes off on outside work.
The VIEILLE MONTAGNE ZINC COMPANY imports largely from its works in Belgium WHITE OXIDE of ZINC in a dry powder, and the casks bearing their mark. They are only to be obtained in London, and are forwarded, for the convenience of all in any of their Agents, residing in the following towns, viz.: London, Liverpool, Birmingham, Hull, Newcastle, Leith, Glasgow, Bristol, Plymouth, Norwich, Ipswich, Dublin, Cork, Belfast, and Jersey.
The same article ground "fine" to a White Zinc Paint, may be also obtained from the Company's Agents of the above-named localities, as likewise from their Grinding Agents, Messrs. DEVAUX and Co. 45, King William-street, City, London; and Messrs. MOFFAT ANDERSON and Co. Timber Bush, Leith, Scotland. Pure White Zinc Paint may likewise be purchased from Messrs. BLUNDELL SPENCE and Co. Hull.
For further particulars apply to Mr. H. F. SCHMOLL, General Agent for the United Kingdom, to the Company's offices, 18, Mincing-lane-buildings, Wormwood-street, London.

THE WASHINGTON CHEMICAL COMPANY, NEWCASTLE-ON-TYNE:
Manufacturers of
PATTINSON'S OXICHLORIDE of LEAD.—
The Washington Chemical Company having, during the last year, established a Manufactory of Pattinson's Oxichloride of Lead on a large scale, and being able to supply it with regularity, and to execute orders without delay, now proceed to bring the new and valuable preparation of Lead before their friends and the public, under the conviction that it will not, in the present case, be considered as a new thing, and that if fairly tried, it must make its way, and finally take its place as one of the important manufactures of this country.
Pattinson's Oxichloride of Lead is a chemical combination of one equivalent of Chloride of Lead, and one equivalent of Oxide of Lead; it being well known that common White Lead is a chemical combination of one equivalent of Oxide of Lead, and one equivalent (or three atoms) of Carbonic Acid, or what is called in chemical language, Carbonate of Lead. Now there is no reason to conclude that Carbonate of Lead is the only compound of lead valuable as a paint, and still less that it should be the best compound of lead for that purpose. To point of fact it is not so, for the newly-discovered Oxichloride is most, if not in all respects, by far superior; its colour is brilliantly white, and in a number of cases has been found equal to the best White Lead that could be obtained, and after a period of upwards of two years it has been found to retain its white colour, considerably better than the lead against which it was tried.
But the chief and by far the most important advantage it possesses is its remarkable and very decided superiority of Body; by which term the power of covering surfaces well and economically is understood to be meant. The discovery of this discovery was made by a very able practical chemist, and since then the Washington Chemical Company have had abundant opportunities of placing its superiority in this important particular beyond all doubt. They have themselves performed a number of experiments, and have also caused a number of experiments to be performed in the large way, by various practical men, to accurately ascertain its covering power as compared with the best lead (white lead). These experiments have proved to be as 60 to 100, that is, 60 lbs. of Oxichloride Paint will cover as much surface as 100 lbs. of the best White Lead, the saving of cost being in the same proportion; besides this, the covering is thicker and more protective, and does not run down, as the Oxichloride dries into a hard, tough body, more like an Enamel than paint.
In using these Paints, it is necessary for the materials with which it is mixed to contain no free acid, and the linseed oil employed as usual both for work inside and out. Pure Turpentine and Leather Dryers, the Oxichloride is found to be peculiarly suitable. The Washington Chemical Company strongly recommend the newly-discovered substance to the notice of consumers, both on account of its great body, and the lasting and beautiful qualities as a paint.
